DESIGN AND ANALYSIS OF ALGORITHMS LABORATORY (Effective from the academic year 2018 -2019) SEMESTER – IV Course Code 18CSL47 **CIE Marks** 40 Number of Contact Hours/Week 0:2:2 SEE Marks 60 Total Number of Lab Contact Hours 36 Exam Hours 03 Credits – 2

Course Learning Objectives: This course (18CSL47) will enable students to:

- Design and implement various algorithms in JAVA
- Employ various design strategies for problem solving.
- Measure and compare the performance of different algorithms.

Descriptions (if any):

- Design, develop, and implement the specified algorithms for the following problems using Java language under LINUX /Windows environment. Netbeans / Eclipse or IntellijIdea Community Edition IDE tool can be used for development and demonstration.
- Installation procedure of the required software must be demonstrated, carried out in groups and documented in the journal.

| 8- 0 | ups and documented in the journal. | |
|----------------|--|--|
| Programs List: | | |
| 1. | | |
| a. | Create a Java class called <i>Student</i> with the following details as variables within it. | |
| | (i) USN | |
| | (ii) Name | |
| | (iii) Programme | |
| | (iv) Phone | |
| | Write a Java program to create <i>nStudent</i> objects and print the USN, Name, Programme, and | |
| | Phoneof these objects with suitable headings. | |
| b. | Write a Java program to implement the Stack using arrays. Write Push(), Pop(), and | |
| | Display() methods to demonstrate its working. | |
| 2. | | |
| a. | Design a superclass called <i>Staff</i> with details as StaffId, Name, Phone, Salary. Extend this | |
| | class by writing three subclasses namely <i>Teaching</i> (domain, publications), <i>Technical</i> | |
| | (skills), and <i>Contract</i> (period). Write a Java program to read and display at least 3 staff | |
| | objects of all three categories. | |
| b. | Write a Java class called <i>Customer</i> to store their name and date_of_birth. The date_of_birth | |
| | format should be dd/mm/yyyy. Write methods to read customer data as <name,< th=""></name,<> | |
| | dd/mm/yyyy> and display as <name, dd,="" mm,="" yyyy=""> using StringTokenizer class</name,> | |
| | considering the delimiter character as "/". | |
| 3. | | |
| a. | Write a Java program to read two integers a and b . Compute a/b and print, when b is not zero. | |
| | Raise an exception when b is equal to zero. | |
| b. | Write a Java program that implements a multi-thread application that has three threads. First | |
| | thread generates a random integer for every 1 second; second thread computes the square of | |
| | the number and prints; third thread will print the value of cube of the number. | |
| 4. | Sort a given set of <i>n</i> integer elements using Quick Sort method and compute its time | |
| | complexity. Run the program for varied values of $n > 5000$ and record the time taken to sort. | |
| | Plot a graph of the time taken versus n on graph sheet. The elements can be read from a file | |
| | or can be generated using the random number generator. Demonstrate using Java how the | |
| | divide-and-conquer method works along with its time complexity analysis: worst case, | |
| | average case and best case. | |
| 5. | Sort a given set of n integer elements using Merge Sort method and compute its time | |

| | complexity. Run the program for varied values of $n > 5000$, and record the time taken to sort. Plot a graph of the time taken versus n on graph sheet. The elements can be read from a file or can be generated using the random number generator. Demonstrate using Java how the divide-and-conquer method works along with its time complexity analysis: worst case, average case and best case. |
|-----|--|
| 6. | Implement in Java, the 0/1 Knapsack problem using (a) Dynamic Programming method (b) Greedy method. |
| 7. | From a given vertex in a weighted connected graph, find shortest paths to other vertices using Dijkstra's algorithm . Write the program in Java. |
| 8. | Find Minimum Cost Spanning Tree of a given connected undirected graph using Kruskal'salgorithm. Use Union-Find algorithms in your program |
| 9. | Find Minimum Cost Spanning Tree of a given connected undirected graph using Prim's algorithm . |
| 10. | Write Java programs to (a) Implement All-Pairs Shortest Paths problem using Floyd's algorithm . (b) Implement Travelling Sales Person problem using Dynamic programming. |
| 11. | Design and implement in Java to find a subset of a given set $S = \{S1, S2,,Sn\}$ of n positive integers whose SUM is equal to a given positive integer d . For example, if $S = \{1, 2, 5, 6, 8\}$ and $d = 9$, there are two solutions $\{1,2,6\}$ and $\{1,8\}$. Display a suitable message, if the given problem instance doesn't have a solution. |
| 12. | Design and implement in Java to find all Hamiltonian Cycles in a connected undirected Graph G of <i>n</i> vertices using backtracking principle. |

Laboratory Outcomes: The student should be able to:

- Design algorithms using appropriate design techniques (brute-force, greedy, dynamic programming, etc.)
- Implement a variety of algorithms such assorting, graph related, combinatorial, etc., in a high level language.
- Analyze and compare the performance of algorithms using language features.
- Apply and implement learned algorithm design techniques and data structures to solve real-world problems.

Conduct of Practical Examination:

- Experiment distribution
 - o For laboratories having only one part: Students are allowed to pick one experiment from the lot with equal opportunity.
 - o For laboratories having PART A and PART B: Students are allowed to pick one experiment from PART A and one experiment from PART B, with equal opportunity.
- Change of experiment is allowed only once and marks allotted for procedure to be made zero of the changed part only.
- Marks Distribution (Courseed to change in accoradance with university regulations)
 - e) For laboratories having only one part Procedure + Execution + Viva-Voce: 15+70+15 = 100 Marks
 - f) For laboratories having PART A and PART B
 - i. Part A Procedure + Execution + Viva = 6 + 28 + 6 = 40 Marks
 - ii. Part B Procedure + Execution + Viva = 9 + 42 + 9 = 60 Marks
